(Fast & secure mobile banking deposits reporting solution)

PRODUCT FACT SHEET

FORMAT SMS-Enabled Computer Software

MANUFACTURER Splash Technology Ltd.

SUMMARY **mobileBanker**[®] is an inexpensive communication solution that enables your Mobile Bankers to use SMS (Text Messages) to instantly report Deposits that they mobilize in the field, and also confirms receipt of respective deposits by instantly sending SMS to your Clients.

This solution records all transactions in a database and exports these records to Microsoft Excel for you to analyze or even import into your banking software. This way, long hours of manual data entry at the back office are eliminated, thus saving you significant operational costs.

FEATURES

- **Confidential:** No storage of your information on third party systems so only you know how much you are mobilizing
- **Secure:** Instant reporting of deposits from the field ensures that records cannot be tampered with. Optionally, receipts can be printed onsite for clients
- **Flexible:** As with your existing system, Clients can deposit any amount of their choice
- **Fast:** Transactions are logged and confirmed via SMS

instantly

- **Reassuring:** Instant confirmation of deposits serve to reassure your Clients that their monies are safe
- **Accurate Data Entry:** On-site records entry by your Mobile Bankers combined with automated validation by the solution eliminate errors associated with mass data entry
- **Low Cost of Deployment/Operation:** Relying solely on the infrastructure of existing mobile phone networks eliminates the need to invest in expensive data connectivity hardware. Practically, the solution can be deployed to work across the country at no extra cost
- **Low Cost of Operation:** No printing and no payment for third party storage of information lead to significant cost savings for you
- **Scalable:** The solution can be built on/expanded to provide other SMS-based customer-centered services (balance enquiry, etc.)

Communication Server

- **Instant Internal Communicator:** Can be used to instantly communicate important information to all Field Collectors (alerts, etc.)
- **Promotions Broadcaster:** Can be used to easily send promotional information to all Customers on new policies, promotions, rates, etc.

Internal & Customer Communications Module

mobileAdvantage (mADVMax) Printer (THERMAL MOBILE RECEIPT PRINTER)

This slim lightweight portable printer can be used with the mobileBanker® system for your field agents to issue receipts of deposits instantly in the field.

Key Features:

Your mobile collection agents can use it to send SMS to report deposits to the Splash mobileBanker® system

The unit can print receipts for customers that make deposits. The receipts are sent from the mobileBanker® server after the server records the respective deposits

The unit uses thermal printing technology, so no print cartridges are required.

The unit is powered by rechargeable batteries so there is no need to keep buying new batteries

The unit can be operated with any of the local GSM SIM cards
